

Trade Declaration

TradeXchange® Trade Declaration enables the trading community to exchange declaration information with Singapore Customs and other government agencies.

With TradeXchange® Trade Declaration, end-users can expect seamless access to TradeNet®. The preparations of trade declaration submissions and receipts of approved permit messages can be integrated with the in-house systems of the end-users or with the Value-Added Service (VAS) suite of solutions if the users engage the services of the VAS providers.

For the end-users both upstream and downstream, there will be operational and procedural improvements as information can be transmitted directly from and to their in-house systems or through the VAS suite of solutions. This reduces the cost and turnaround time for the preparation and submission of declarations to the relevant government agencies, hence facilitating faster cargo clearance.

TradeXchange® Trade Declaration Workflow

Features

- ▶ Streamline trade permit preparation, applications and receipts
- ▶ Real-time access to trade information and references
- ▶ Simplify application of Certificate of Origin

Benefits

- ▶ Simplifies trade processes with one-stop interface for all trade permit application and electronic payment services
- ▶ Cost and time savings with increased efficiency and elimination of manual processes
- ▶ Improves reliability of data with automated system check
